Hiring Manager, Human Resources Division
SK C&C USA, Inc.

October 22, 2025

Dear Hiring Manager,

I'm Jaehoon Song, one of the students who have a major in computer programming in Gwinnett Technical College.

Since Mr. Anderson and Ms. Johnson announced your company is now in need of a student close to graduation that is English / Korean bilingual for a potential job, I have thought that my background and circumstances perfectly satisfied the needs.

I do have my perfect bilingual skill in Korean and English since I was born in Korea and had lived in Korea for twenty years. Unfortunately, I do not have any experience in the required software, MES, WMS, QMS/SCM/EMS. However, I believe I can fit into your company in a quick because I'm an enthusiastic and passionate learner who can hardly train oneself.

Moreover, I'm capable of dealing with a lot of programming languages in general, Java and Oracle DB in particular.

As a native Korean, a permanent resident of the united states, and a GTC student who seeks to obtain a job opportunity, I send this email to you with my updated resume.

Thank you for your time and consideration.

Sincerely,

Jaehoon Song
